 120. <

The present invention provides concealed carrying of a weapon, preferably a handgun, by a law enforcement officer or the like. The handgun is supported on the upper back of the wearer, preferably between the wearer's shoulder blades. The handgun is held in a holster having a body that is formed to match the contour of the gun. The holster includes a sheath of flexible material extending across the upper back of the wearer. The sheath is held in place by a pair of shoulder straps and a pair of armpit straps.
